SURGIWEAR was established in 1982 with the motto to conceive, design & develop; to manufacture and market innovative medical devices of finest quality for common people. Almost 1/4th population of the world is treated with Hydrocephalus Shunt manufactured by SURGIWEAR in Shahjahanpur. Today SURGIWEAR manufactures almost 300 types of products serving the needs of common people. The products include Implants as well as Disposables. All of the products of SURGIWEAR certified by EN ISO 13485-2012 certification and exported all over the world.

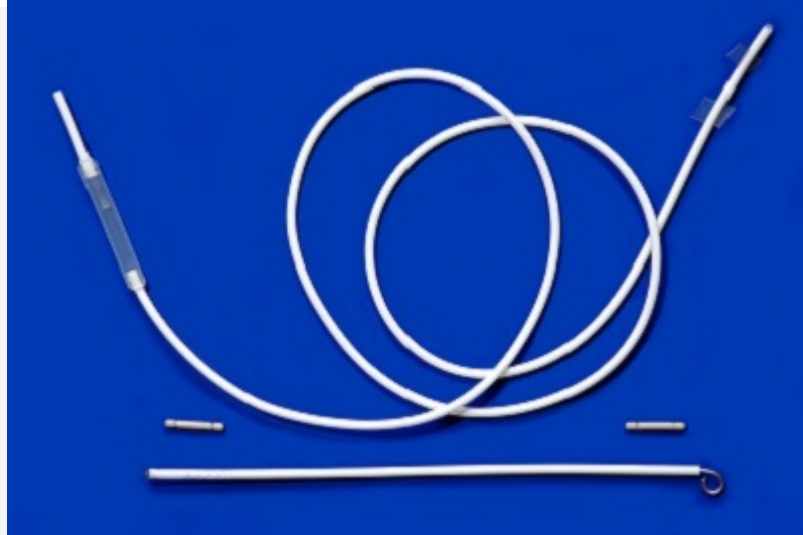

Products Description

Chhabra Slit n Spring Hydrocephalus Shunt System

Product Category	Implants
Product Sub-Category	Surgical Implant
Technical Details	Chhabra Slit n Spring Hydrocephalus Shunt System is today a widely used low cost system all over the world. The Chhabra Shunt system incorporates a new strategic development in shunt technology and ensures that it valve will suffer neither from deformation nor from overstretching. Even under conditions of stress, the valve maintains its optimum functional capability.

Z Flow Hydrocephalus Shunt & Valve

Product Category	Implants
Product Sub-Category	Surgical Implant
Technical Details	Z Flow Shunt is the result of a new and scientific approach to hydrocephalus shunting. It controls pressure precisely in all the postures of the body. The valve of a Z flow shunt adjusts its resistance to the flow of CSF according to a change in the postures of the body.

G-Bone Modified Hydroxyapatite Granules(10cc & 1cc pack), Blocks & Dowels

Product Category	Implants
Product Sub-Category	Orthopedic Implant
Technical Details	Surgiwear's Hydroxyapatite products are world renowned and have successful user experience of more than 20 years. Modified Hydroxyapatite is a combination of HA 40%(Hydroxyapatite) & B-TCP(Beta- tricalcium phosphate) is 60%. It consists of nano crystal agglomerates. It has excellent osteo-conductive properties bordering to the level of osteo-inductive property. With this material bone healing is very fast.

G-Bone Synthetic Hydroxyapatite Granules(10cc & 1cc pack), Blocks, Dowels & Powder

Product Category	Implants
Product Sub-Category	Orthopedic Implant
Technical Details	Surgiwear's Hydroxyapatite products are world renowned and have successful user experience of more than 20 years. Synthetic Hydroxyapatite is a pure nanocrystalline HA. Nano crystals mimic biological HA, present in our human body. Here healing is faster than other macrocrystal HA available from other sources. It consists of nano crystal agglomerates. It has excellent osteo-conductive properties. This powder can be mixed with any plasma expander to make an injectable paste. It can be injected through a thick needle (14 gauge) to the site. Useful for non-union of bone.

G-Bone CP Cement

Product Category

Implants

Product Sub-Category

Orthopedic Implant

Technical Details

The non ceramic Hydroxyapatite bone cement has two components. The powder is made of tri-calcium phosphate and tetra calcium phosphate. The fluid has different sodium and calcium salts. The two parts are mixed and putty like material is obtained. It can be used to fill the defects. After mixing it is usable for 3-5 minutes. Adding some drops of water can prolong usability but it may disturb ultimate strength. The hardening process continue and ultimate hardening may take 12-24 hours. It can also be mixed with antibiotics for slow release of antibiotic at the site. Supplied sterile, the kit contains powder sachet, liquid ampule, spatula, syringe and mixing dish.

GISAIM Peritoneo Venous Shunt

Product Category

Implants

Product Sub-Category

Surgical Implant

Technical Details

The peritoneo-venous shunt has a limited but definite place in the treatment of a patient who has ASCITES which is resistant to medical management. It reduces abdominal girth and weight, improves plasma volume and is associated with an improvement of renal function and a reduction of salt retention. In contrast medical therapy seems to compromise renal function. Although the peritoneo-venous shunt does not prolong life, it does improve its quality. There are complications associated with its use and it should, therefore, be inserted with care.
