AM INNOSPIN SYSTEMS PVT LTD specialises in spinning and material handling and provides custom designed turnkey projects for automation in material handling and transport for in-process material such as roving bobbins and shop floor management of CANS in textile Mills using RFID technology. Our Company has developed many innovative products for the ring frame to improve both quality and productivity supplying some parts exclusively to OEMs for more than two decades. Our recent project being relocation of Complete Plant from Korea to India for manufacturing Ring Travellers with all technical transfer and buy back agreement. We are committed to our mission to provide sustainable development in machinery manufacturing for the spinning industry.

Products Description

SPINNING RINGS

Technical Details	Core hardness 64HRC Surface hardness 1050-1150 HVI Roughness 0.10-0.20(um) Finish-super polished corrosion resistance-excellent/non corrosive
ITC HS Codes	8448 33
Certification/ Standard	OTHERS

BRAND INDIA ENGINEERING E-CATALOGUE

Issuing Agency	Trade Mark Registry
Date of Issue	20-01-2016
Date of Expiry	20-01-2027
End Use Sectors	Spinning Mills
Product Images	0

Ring Travellers

Technical Details	Improved life due to special raw material used. Accurate sizes and weight of travellers ensure consistent quality for universal spinning applications.
ITC HS Codes	8448 33
Certification/ Standard	Trade mark Registry
Issuing Agency	TradeMark Registry-Govt. Of India
Date of Issue	20-01-2016
Date of Expiry	20-01-2027
End Use Sectors	Spinning Mills
