PPS International is a partnership firm currently engaged as an Indian agent for the foreign companies to represent them in India for the sales and after sales activities for their components / equipment's / systems for Railways and Metros. PPS International realized that we should do more and more value addition in our present activities of sales and after sales by starting our manufacturing unit by acquiring the Technology from our existing foreign partners to give benefit to our customers by making "Make In India" and to make available "European Products at Indian Price". Besides acquiring technology, our efforts continued to Setup our own R&D, which helped us to design & develop several components with unique features. We have complete infrastructure and team of qualified engineers to provide the services to our customers and overseas suppliers having technical specifications and requirements of the customers work in a niche market i.e. mainly with Railways & Metros and that too only in Electrical and that too only in latest technology / equipment's for Rolling Stock & modern infrastructure projects, i.e. DC Substation & 25 KV OHE.

Products Description

Set of Connector

BRAND INDIA ENGINEERING E-CATALOGUE

Technical Details	Products as per CLW Specification No. CLW/ES/3/0124/N
ITC HS Codes	853590
