Mitra Medical Services LLP is the first company in India to manufacture highly specialized medical devices called Video Endoscopes and its accessories. Our company has developed an expertise in commercializing R&D, with target to engineer products currently not being manufactured in India. R&D is backed by patents in each of domains including design and trademark registrations. Products confirm to global standards of safety, certification and performance. Backed by a dedicated manufacturing setup, which is scalable, Mitra Medical Services LLP is continuously relying on its core technology for creating newer applications which assist in early diagnosis / detection for timely treatment. This emphasis reduces the healthcare burden on the economy / infrastructure / imports, as all add up to a high cost of treatment especially during terminal phase of illness treatment. This has resulted not only in India's self-reliance in the field of high technology medical devices but also a step towards government's initiative of 'Make in India'.

Products Description**OTTOMED SMARTEYE-II mBLU VIDEO ENDOSCOPY SYSTEM**

Product Category	Diagnostic & Imaging Instruments
Product Sub-Category	Electro diagnostic Apparatus

BRAND INDIA ENGINEERING E-CATALOGUE

Technical Details

HD Digital Video Endoscopy System with futuristic LED illumination and Band Imaging for early detection of diseases of digestive tract. Advanced Imaging Technology for Crisp Natural Images and Superb Mechanics for smooth operation of the system.

Sectors of Interest

HOSPITALS, NURSING HOMES, MEDICAL TEACHING INSTITUTIONS, GASTROENTEROLOGISTS, SURGEONS, PHYSICIANS ETC.

Is After Sales Service Provider?

Yes

Importance of niche products

Flexible Video Endoscopes are a very important medical device used by doctors for investigation, diagnosis and treatment of diseases like bleeding, ulcers, cancerous tumours etc. of gastro intestinal tract of human patients. By employing LED lighting technology at the tip of the Video endoscope, we also have eliminated the need to use fragile glass fibres in the endoscopes, thereby increasing life and durability of endoscope and eliminating recurrent breakdowns owing to breaking of these glass fibres during endoscopy procedures. Our technology of LED endoscopes has made a fundamental change in the endoscopy systems.

Potential market of niche products

Our products are used in Hospitals, Nursing Homes, Medical Teaching Institutions. They are also used by Gastroenterologists, Surgeons, Physicians, etc.

Product Supply Record

We have supplied our products to countries : Bolivia, Srilanka, Nepal etc.

Patented Technologies

Our company have patent for LED Endoscope in Japan and same applied in India also. There are many other IP registered and pending in India. Japan Patent No.: JP5665199

Awards/Accolades

Our company has received "National Productivity and Innovation Award" 1st Prize from National Productivity Council, Government of India, on dated 22nd Feb 2016.
