Pumpsense Fluid Engineering Private Limited specializes in the manufacture of centrifugal pumps. It also provides pump related services such as retrofit and pump upgrades; training in centrifugal pump selection, operation and maintenance; consulting in the area of problem diagnostics etc. The main products of the company are axially split case, end suction, non-clog sewage, vertical in-line and mixed flow pumps. The company specializes in customized versions of these products. Pumps for NFPA20 fire protection, air-conditioning, industrial cooling water, effluent and sewage handling and municipal services are some of the major market segments served by the company. The company has a modern pump test laboratory of international class and a number of pumps listed by the Underwriters Laboratories (UL) and Factory Mutual (FM). The company exports a major part of its productions to customers in the USA, Australia, Europe, SE Asia and Middle East. Its Indian customers include Tata Steel and BHEL amongst others. The company is known internationally for its strengths in pump design, applications engineering and problems diagnostics.
