Indian Transformers Company Ltd manufactures instrument transformers (current and voltage transformers) of high and extra high voltage classes up to 400 kV. As one of the most reputed make in India, we provide fast and efficient delivery of your current and voltage instrument transformers anywhere in the world. Started in 1979, we have today crossed the 74,000 mark of successfully installed instrument transformers. We also manufacture precision voltage, high power voltage and testing transformers.

Products Description

HV & EHV Instrument Transformers

BRAND INDIA ENGINEERING E-CATALOGUE

Technical Details

High Voltage Instrument Transformers We have a wide manufacturing range of high voltage instrument transformers up to 420 kV in oil-paper insulation. We can offer current transformers in both live tank and dead tank configuration. Inductive voltage transformers are offered in both single and cascaded coils design. We specialize in the production of single phase combined instrument transformers and power voltage transformers and the only manufacturer from India to offer these products. We are the only manufacturer in the world for Flexi-Ratio™ Current Transformers for Smart Metering Applications.
