India is largely known as an agrarian economy as the majority of population is engaged in this primary occupation. Thus, there is need for reliable and cost effective irrigation equipment. Considering this, We Gupta Industrial Corporation established ourselves in the region of Sirhind, (India) in the year 1988. Our centrifugal pumps range in diverse capacities from 100 x 80 mm to 150 x 150 mm. These products are fabricated in our high-end manufacturing unit by making use of the most sophisticated tools and equipment. Further, we are actively supported by a team of proficient and expert professionals. They analyze the variegated needs and requirements of our clients and offer the most appropriate range of products. Quality being our major concern, we always insist on adhering to stringent quality conformation in developing all our products. For that purpose, our quality controllers administer various quality.
