Incorporated in 1969 with a vision to serve mankind, J. Mitra & Co. Pvt. started this venture to preserve human lives, by promoting healthcare, through technology and innovation. J.Mitra ,is the pioneer in manufacturing and marketing of IVD test kits in India. J. Mitra & Co. Pvt Ltd became the first Indian Company to get drug manufacturing licenses for critical tests like HIV , HBV, HCV in rapid and ELISA formats in India. It introduced the technology of differential detection of HIV 1 and HIV 2 in single rapid kit format, a product which still is the market leader after two decades. The company manufactures a range of tests for infectious diseases like HIV,HBV,HCV, Dengue, Malaria, Typhoid, Leptospira in rapid and ELISA test formats. The other products include a range of anti-Sera products and confirmatory tests like Western Blot for HIV. The company has recently introduced Fluorescence Immunoassay technology for quantitative and qualitative range of tests. The company manufactures HbA1c, Vitamin D,T3,T4,TSH and Dengue NS1 in FIA (Fluorescence immunoassay) range.These tests can be performed on state of the art analyzer called i-Quant, developed in partnership with HTIC, IIT Madras. J. Mitra facility is ISO 9001:2008, ISO 13845:2012 & WHO-GMP Certified.

### Products Description

#### HIV TRI-DOT

Product Category

Others-Category

Product Sub-Category

Biotechnology,diagnostics

## BRAND INDIA ENGINEERING E-CATALOGUE

### Technical Details

The HIV TRI-DOT test is a visual, rapid, sensitive and accurate immunoassay for the differential detection of HIV-1 & HIV-2 antibodies (IgG) in human serum or plasma using HIV-1 & HIV-2 Antigens immobilized on an immunofiltration membrane. The test is a screening test for Anti HIV-1 and HIV-2 and is for in vitro diagnostic use only.

### Dengue Day 1

Product Category

Others-Category

Product Sub-Category

Biotechnology, Diagnostics

Technical Details

Dengue Day 1 Test is a rapid solid phase immuno-chromatographic test for the qualitative detection of Dengue NS1 Antigen and differential detection of IgM and IgG antibodies to Dengue virus in Human serum/plasma. This test is for in vitro diagnostic use only and is intended as an aid in the earlier diagnosis of Dengue infection & presumptive diagnosis between primary and secondary Dengue infection

Product Sub-Category

Biotechnology, Diagnostics

Technical Details

The 4th Generation HCV TRI-DOT is a rapid, visual, sensitive and qualitative in vitro diagnostic test for the detection of antibodies to Hepatitis C virus in human serum or plasma. It has been developed and designed with increased sensitivity for core and NS3 antibodies using a unique combination of modified HCV antigen.
