Roto Leaner Technology was established in 2002 by Mr. Vipul Doshi for manufacturing engineering precision products and components mainly for exports. Unprecedented success in our engineering ventures encouraged us to diversify to hospital couches and chairs, rehabilitation equipment's and other utility products for therapists and doctors since. We have committed ourselves with the same vision, quality consciousness, attention to detail and timely delivery services as with our exports. The testimonials for our products by the buyers prove our claims. Our vision is to make and sell niche healthcare products which reduce the stress levels both of the therapists and users, that too at economical prices. The technology used is state of art and satisfies international quality norms. Our mission is to provide high standard Hospital Furniture's at attractive prices. We invite queries from the buyers and assure them a quick response.
