We are an ISO 9001:2008 certified company and proud to announce our position from the year 1997 in the worldwide market as a top-notch isolation transformer, ac chokes and Control Transformers Manufacturers, suppliers and exporters of India. Our products have advantages of high-efficiency, no wave distortion, long time working, suitability for all kinds of loads, suitable voltage adjustment and so on. Our products have a position in the market and we always keep ourselves updated with the latest market changes to maintain that reputation among our customers.

Products Description

Control Transformer

Technical Details

Control transformers are essentially isolation transformers that provide great voltage regulation. They are engineered for brief periods of the overload condition, also called "inrush current", as they produce a high level of secondary voltage stability during these periods. Usually, they are used in electronic circuits that need a regular supply of voltage or current with a low power.
