Incorporated in 1996, Pneumo Care Health Pvt. Ltd. has pioneered many new Technology introduction in India especially Sleep Medicine , NIV , Oxygen therapy by OC, Nebulisation of Ventilated patients among several others . Mr Deepak and Mr Parveen are promoters and Mentors of this company and have been guiding it over these many years to make it one of the most reputed Indian company. PneumoCare is acknowledged to be India's Leading R&D Centre for new patented Medical Devices for applications in the fields of Critical Care , Respiratory and Sleep Medicine. In 2011, PneumoCare commenced its R&D of medical devices with unique and patented technologies to provide greater patient comfort at reduced costs . This resulted in the development of Easy2Clean Mask NIV Full Face masks which could be used in the hospitals as well at home. In 2017 these technologies were further developed to launch two brand new Inventions & innovations: The Easy2Neb Vented NIV masks and the BroncoMask. Hospicuff was released to fabulous reception from every user. NebHME BANSet in 2018 has potential to change the face of Aerosol therapy to ventilated patients providing a safe, infection free and cost effective environment for them in the ICUs.

Importance of niche products

NebHME BANSET are the Siamese Twins on PneumoCare which introduce the concept of Drug optimization , infection control , cost savings and early discharge of patients from ICUs by its unique ability to conduit Aerosol through the HME and ability to keep the circuit sealed even during times of nebulizer change. All PneumoCare products are extensively researched and developed in India and have many design and patents registrations.

Potential market of niche products
