

## HUMP MAGNET

### DUAL PROTECTION - ZIG- ZAG MAGNETIC SEPARATOR

PMT Hump Magnet are best suitable and effective for Iron separation from high volume flow gravity applications.

There are two Magnet Plates hinged on opposite sides of the MS housing. These magnet plates arrest all the iron particles from the product/material as the flow of the material slows down as it changes from vertical flow to 45 degree because of the specialized hump design. The product strikes 1ST magnet plate & then the 2nd magnet plate on the opposite side. These plates can be easily swung open & cleaned. In case of space restrictions, **PMT Half Hump Magnet** fit in for effective solution of iron separation.

### UNIQUE PROPOSITION:

**Easy to Clean** - Hinged Magnet Plates - swung open for cleaning

**Zig-Zag Design** - Slows down the product flow volume for effective iron separation

**Easy Installation** - Existing processing line/ system

**Plug & Play** - Ready for operation from Day 1

**Flexible** - Flexibility to select half hump or larger structure

**Dual protection** - 2 Magnet Plates for better performance in capturing of iron particles

### FEATURES:

**Economical & Maintenance Free** - No operating cost

**Simple & Easy installation** - Existing processing line/system

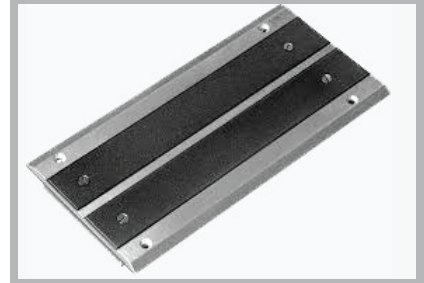

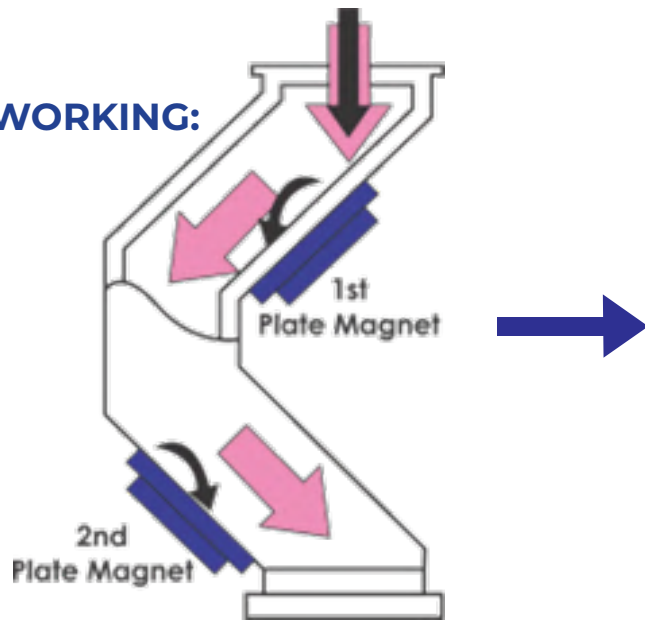

**Versatile** - Standard and Customized sizes

**High intensity Gemini Rare Earth Powerful Magnets** - Removal of fine iron

**Helps in avoiding Machine Damage**

**Effective & Optimum** - Iron Separation
